# BYO RESPONDER

Create Your Own Butler Response Service

CALL FOR SERVICE AND ORDER FOOD USING VIRTUAL BUTTONS

FEATURES AND BENEFITS

* Configure up to 4 buttons, with display texts in any language.

* Easily link to one or more existing food-ordering service providers.

* Show all buttons in one colour or choose individual colours for each button.

* Connect via 3G/4G/5G/WiFi and get unlimited range.

* BYO Butler app for long-term users, web-based client (no app) for one-time users.

* Totally contactless. Sanitisation of the call buttons between use is not necessary.

* No need for electrical wiring. No need to change batteries.

HOW IT WORKS

* Use the BYO Responder app to create your own Butler Response Service.

* Configure the buttons, one button for each type of service you provide.

* Add long-term users by scanning their BYO Butler in-app QR Code.

* Create self-scan locations manually. Capture the screen, print out the QR Code and display at each self-scan location, such as poolside chairs, restaurant tables etc.

NEXT STEPS

* Download the BYO Responder app by scanning or clicking on this QR Code.

* Configure your buttons and try it out with one user.

* Upgrade via in-app subscriptions when you need to add more responders and users.

* Send us an email if you require more user capacity or need help with setup of the app.
